CCG Cable terminations P/L  
P.O Box 285  
Joondalup  
Western Australia WA 6919

Attention: Mark Brown

To whom it may concern,

We at Bechtel are currently involved with the construction and commissioning of the Darwin LNG facility owned by ConocoPhillips.

We are using CCG Ex cable glands, Ex junction boxes and various Hazardous area Ex certified brassware for most of the electrical and instrument installation, hazardous and non-hazardous areas.

CCG have met supply and delivery deadlines with their available stocks. They have always been available when a technical issue has arisen when involved with hazardous areas and been most helpful and knowledgeable.

The service and range of their products is very reliable and we would not hesitate to recommend them for future projects involving hazardous and non-hazardous areas.

Yours Sincerely

Archie Thompson  
Lead Electrical Field Engineer  
Bechtel Australia Pty Ltd  
Darwin LNG Project  
Wickham Point,  
Darwin, N.T.  
Australia
