Mr. Nicholas Lackinger
CCG Cable Terminations Pty Ltd
Kempton Park 1620
Gauteng, South Africa

Dear Sir,

I would like to express my thanks to you and your father on the excellent tour of your facilities in South Africa. The company's state of the art CNC machines, the cleanliness of the factory, testing facilities, nickel plating operation, training center, and over all operation are very professional.

The Angola LNG project used the nickel plated CCG cable glands exclusively and the qualities of the components are very good. The two piece cable gland are both labor saving and provides ease of mind knowing there are no parts of the gland that were not installed which maintains the safety requirements in hazardous locations.

The online and telephone support you provided kept the project moving in the right direction. The additional video instructions you provided on the proper installation method was given to the construction craft to ensure the cable glands were installed properly. The project also used the reducer/adaptors that are made by CCG which also maintained the same quality of the threads and the nickel plating.

Regards,

Kurt L. Pfost
Lead Electrical Field Engineer
Angola LNG Project
Soyo, Angola
