

Kvaerner Process Systems

31st October 2003

CCG Cable Terminations
Att: Mr Mark Brown
P.O Box 285
Joondalup DC 6919
Western Australia

To Whom It May Concern:

Kvaerner Process Systems is based in Perth, Western Australia. Kvaerner Process Systems manufactures power module equipment and process skids for the Oil, Gas and Petroleum Industry.

We at Kvaerner Process Systems, Perth have been using the CCG range of hazardous area Ex certified junction boxes, adaptors, reducers and cable glands since the year 2000.

The technical service and back-up advice available locally, particularly involving hazardous location areas within the area of ATEX certification has been of great benefit to our organisation as the majority of our equipment is manufactured in Australia and then exported into the highly competitive European market.

We look forward to using CCG in the future and would recommend the product for use in hazardous areas.

Regards

Tien Do
Engineering Manager
