SUBJECT : Performance of CCG Glands and Junction boxes at Yara Pilbara Ammonia Plant(Ex Burrup Fertilisers)

Corrosion Guard range of cable glands and Posi box Junction boxes manufactured by CCG are used across the Ammonia plant in outdoor areas especially where the atmosphere is highly saline and corrosive.

We find the performance has been excellent over the last 8 years and we had no issues with these products. This is mainly because of the glands' non-corrosive and non-metallic outer cover protecting the glands' inner parts.

In the same way, we find the Posi box Junction boxes easy to open even after many years of operation in corrosive areas compared to serious corrosion issues faced with metallic junction boxes.

Yours sincerely

Yara Pilbara Fertilisers Pty Ltd

Bose John
