

EU Type Examination Certificate CML 16ATEX1001X Issue 7

- 1 Equipment intended for use in Potentially Explosive Atmospheres Directive 2014/34/EU
- 2 Equipment **Cable Gland Series E1EX (VS)(QS)(VX), E1EX-U (VS)(QS)(VX), E1EX Lead Seal, D1EX (QS)(VX), CXe, CWe, EXCG (VS)(QS)(VX), VRTX SWA, FLP (QS)(VX), ARMORTEX (QS)(VX), EXCG-Lead Seal, FLP-TR (QS)(VX), FLPHOSE (QS)(VX), POSI GRIP (QS)(VX), A2EX (VS)(QS)(VX), A2EX-FHC (VS)(QS)(VX), VRTX, UNITEx-D (VS), UNITEx-E, UNITEx~(QS)(VX), UNITEx-F, UNITEx-F~(QS)(VX), A2F-FHC (QS)(VX), TMC, TMCX**

3 Manufacturer **CCG Cable Terminations PTY LTD**

4 Address 33-37 Forge Road,
Spartan Ind Area,
Kempton Park, 1619,
South Africa

5 The equipment is specified in the description of this certificate and the documents to which it refers.

6 CML B.V., Chamber of Commerce No 6738671, Koopvaardijweg 32, 4906CV Oosterhout The Netherlands, Notified Body Number 2776, in accordance with Article 17 of Directive 2014/34/EU of the European Parliament and of the Council, dated 26 February 2014, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in the confidential reports listed in Section 12.

7 If an 'X' suffix appears after the certificate number, it indicates that the equipment is subject to conditions of safe use (affecting correct installation or safe use). These are specified in Section 14.

8 This EU Type Examination certificate relates only to the design and construction of the specified equipment or component. Further requirements of Directive 2014/34/EU Article 13 apply to the manufacture of the equipment or component and are separately certified.

9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the confidential report, has been demonstrated through compliance with the following documents:

EN IEC 60079-0:2018

EN 60079-1:2014

EN 60079-7:2015

EN 60079-31:2014

10 The equipment shall be marked with the following:

II 2 G D

Ex db IIC Gb

Ex eb IIC Gb

Ex tb IIIC Db

IP66/67/68 (2m), IP65 (as applicable)

Refer to description for specific marking

Not applicable to NPT thread. Applicable to all parallel thread (e.g. Metric and BSP parallel). Optional for Ex d application without IP rating. (RE-FLEX cord may be used as an alternative to a standard sealing gasket.)

QS The QS in the table above, refers to the Quickstop version of the cable glands. This utilises a clear potting compound to achieve a hard setting seal inside the gland. The sealing compound is transparent and accommodates inspection.

VX The VX in the table above, refers to the Vortex version of the cable glands. This utilises a coloured potting compound to achieve a hard setting seal inside the gland. There is a transparent elastomeric seal at the end of the compound enclosure to accommodate inspection.

The QS or VX or Ex Resin compounds may be utilised as follows:

- A seal within the front part of the gland, with no elastomeric seal clamping on it
- A seal within the front part of the gland, with the elastomeric seal clamping on it, therefore acting as the bedding for the cable
- A seal within the front part of the gland applied around the conductors within a metal sleeve. An elastomeric seal clamps onto the metal sleeve. The gland may only be used with the metal sleeve (when supplied with the gland and marked QS or VX) since the internal gland construction only accommodates the large diameter of the metal sleeve for seal clamping

CML 16ATEX1001X
Issue 7

Note: Cables/cable bedding as above does not form part of the approval of glands.

Cable glands that are available as both barrier (QS or VX) and non-barrier versions may be supplied as non-barrier versions together with the additional components needed to convert them to barrier versions if required. When the conversion is carried out the product marking does not need to be changed

Combination glands

Armoured glands type E1EX, E1EX-U and UNITEx-D are made to accept two different cable inner bedding and outer sheath diameter size ranges for each gland body size by the fitting of alternative seals and matching components. The smaller cable diameter version is known as the 's' size. E.g. 2s is a size 2 gland with smaller bore seals. Combination glands are allowed (known as 'L' versions, e.g. 2L) where the components for an 's' size are used for the cable bedding and components for the standard size are used for the cable sheath.

RE-FLEx Sealing Cord

To achieve IP66/67/68, an alternative to a standard sealing washer is to use RE-FLEx sealing cord. This is intended as a retrofit solution and must be installed according to the fitting instructions supplied with it.

Materials

Description	Materials
Metallic Parts	BRASS (Nickel-plated) CZ121, Stainless steel 316, BRONZE PB2, MILD STEEL (EN8), Aluminium 6063
Spring	Stainless steel 316
Corrosion guard	30% GLASS PBT KP213G40, Nylon (Not an essential part of the explosion protection)
Skid Ring	BRASS (Nickel-plated) CZ121, STAINLESS STEEL 316, BRONZE PB2, MILD STEEL (EN8), Aluminium 6063 HDPE D7255/HL (-100°C to 120°C) or PTFE CCG-PTFE-001(-270°C to 260°C) Nylon (-65°C to 120°C)
Sealing Compound	Clear Quick Stop Ex Resin S50/EPA (-50°C to 115°C) Coloured Vortex Resin S50/EPA/Y (-50°C to 115°C)
Outer/Inner/Resin Seals	EPDM (64 Shore) (-60°C to 120°C) or Silicone CCG G/65-1R (-70°C to 180°C) or Silicone CCG G/65-1C (-70°C to 180°C)
End stops	
Posi grip	30% Glass filled Polyester CCG PBT SPESIN KP213G30 (-30°C to 125°C) RTI = 120°C, Nylon (-65°C to 120°C) **
Sealing Gasket	HDPE D7255/HL (-100°C to 120°C) or PTFE CCG-PTFE-001(-270°C to 260°C) or Nylon (-65°C to 120°C) or RE-FLEx PTFE cord (-268°C to +260°C)

**CML 16ATEX1001X
Issue 7**

**The plastic material for the Posigrip is external to the metallic parts. The Plastic Nipple Nut is a part that is fitted over the metallic Inner with its only function to clamp against the Sealing gasket and to assist in tightening/dismantling the Inner. The Outer nut plastic is moulded over the metallic part which maintains the mechanical strength of the gland.

** Use of Metal sleeve and clear sealing compound as indicated below. (Quickstop- QS on Marking) or metal sleeve and coloured sealing compound (Vortex – VX on marking)

(CG) Parts manufactured from Non-metallic or specifically adapted for fitment to corrosion guard

Not applicable to NPT thread. Applicable to all parallel thread (e.g. Metric and BSP parallel). Optional for Ex d application without IP rating.

A thin copper/brass disc may be utilised in the (VS) gland variant between the inner seal and the cone for earth continuity to a metallic cable screen (e.g. variable speed drive cable or a lead sheathed cable). The sealing arrangement between the inner seal and the potted sleeve is not affected. Note that a standard cable gland type can be converted to a (VS) variant by retrofitting the thin copper / brass disc. The product marking does not need to be changed when the copper / brass disc is retrofitted.

Armoured Cable Gland Series TMC, TMCX for MC, MC-HL or Teck cables

Variation 1

This variation introduced the following modifications:

- i. To update the certificate reference to the 2014/34/EU Directive.
- ii. To update EN 60079-0:2012+A11:2013 to IEC 60079-0:2017, Ed 7 (Latest technical knowledge)
- iii. To include additional models to the range of glands.

Variation 2

This variation introduced the following modifications:

- i. To allow the diameter over cores to increase to 12.5mm and number of cores to increase to 13 for the Size 1 gland arrangements.
- ii. To allow modifications to the Size 7 corrosion guard.

Variation 3

This variation introduced the following modifications:

- i. To permit an alternative EPDM seal material.
- ii. To permit a nylon alternative material for sealing gaskets and skid washers.
- iii. To update the product description temperature range for the alternative EPDM sealing gaskets and nylon sealing gaskets. The Conditions of Use are also updated to include the alternative temperatures allowable.
- iv. To permit the option to manufacture products with intermediate metric thread sizes.
- v. To increase the E1EX-D outer seal nut size.

CML 16ATEX1001X
Issue 7

Variation 4

This variation introduced the following modifications:

- i. To allow the product type name changes as follows:
UNITEx becomes UNITEEx-E
E1EX-D becomes UNITEEx-D
- ii. To permit the Vortex resin barrier arrangement as an alternative to the Quickstop resin system.
- iii. References to E1EX-D~QS are changed to UNITEEx~QS and the E1EX-D~QS name is removed from the certificate. (The two glands are physically identical).
- iv. The A2F-CG range is removed from the certificate.
- v. The description and relevant conditions are updated to include the alternative resin barrier arrangement and to reference the model name changes above.
- vi. To update the IEC 60079-0:2017 standard to EN IC 60079-0:2018.

Variation 5

This variation introduced the following modifications:

- i. Removal of A2F, A2FX, and A2FH glands and their variants from the certification.
- ii. Addition of aluminium as a material option for the cable glands.
- iii. Addition of nylon as a material option for the Corrosion Guard and Posi Grip glands.
- iv. Addition of an option for a deluge seal to be included on the E1EX range
- v. Allowance of combination glands for armoured cable.
- vi. Allowance of "VS" option cable glands to include lead sheathed cables
- vii. Allowance of "VS" option cable glands to have the earth contact disc retrofitted
- viii. Introduction of the A2F-FHC and A2F-FHC~QS (VX) glands
- ix. Introduction of an alternate thread sealing method
- x. Transfer of ATEX Certificate from CML UK to CML BV.

Variation 6

This variation introduced the following modifications:

- i. Introduction of the TMC and TMCX glands
- ii. To correct and simplify the allowable temperature ranges.
- iii. The description and Specific Conditions of Use have been updated in accordance with the modifications above
- iv. To update certificate with new CML BV address.

Note: Drawings that describe the equipment or component are listed in the Annex.

13 Conditions of Manufacture

The following conditions are required of the manufacturing process for compliance with the certification.

- i. Where the product incorporates certified parts or safety critical components, the manufacturer shall ensure that any changes to those parts or components do not affect the compliance of the certified product that is the subject of this certificate.
- ii. Cable glands with intermediate metric entry thread sizes shall be constructed by enlarging the entry thread size of the standard size product immediately below the intermediate thread size. The minimum entry wall thickness, allowable number of cores, cable size range and constructional parts utilised (other than the entry thread component) shall not differ from that of the standard size used.
- iii. When constructed of aluminium, the glands shall not be marked for Group I applications.
- iv. The A2F-FHC and A2F-FHC~QS (VS) glands shall not be marked for Group I applications.

CML 16ATEX1001X
Issue 7

14 Specific Conditions of Use (Special Conditions)

The following conditions relate to safe installation and/or use of the equipment.

General Conditions

- i. When the Quickstop or Vortex glands are supplied with the metal sleeve and cementing, they shall be fitted with the metal sleeve and cementing since the internal gland construction only accommodates the large diameter of the metal sleeve for seal clamping.
- ii. The cable glands shall only be used where the temperature, at the point of entry, is between:
 - Posigrip: -30% glass filled polyester (-20°C and +95°C) or nylon (-60°C to 100°C)
 - Quickstop or Vortex resin, when used with any gaskets/skid rings: (-50°C and +95°C)
 - EPDM seals & HDPE gaskets/skid rings: (-60°C and +95°C)
 - EPDM seals & Nylon gaskets/skid rings: (-60°C and +100°C)
 - Silicone seals & PTFE gaskets/skid rings: (-60°C and +160°C)
 - The corrosion guard is not an essential part of the explosion protection. The corrosion guard material has a Relative Temperature Index (RTI) of 120°C.
- iii. Only the compounds as supplied by the manufacturer shall be used in the glands.
- iv. Cable glands for unarmoured cable and approved only for group IIC/IIIC (Not group I) shall only be used on fixed installations where the cable is clamped, or stress applied to the cable in the gland is prevented.
- v. The appropriate ingress protection level and/or flameproof characteristics must be achieved and maintained at the interface of the gland with the enclosure.
- vi. When constructed of aluminium, the glands shall not be used in Group I applications.
- vii. When the RE-FLEX sealing method is used, the gland installer shall refer to the manufacturer's instructions.

Conditions for Specific Glands:

The following conditions relate to safe installation and/or use of the equipment.

- i. A2EX-FHC, A2F-FHC and VRTX range of glands:
 - The cable glands shall only be used on fixed installations where the cable is clamped, or stress applied to the cable in the gland is prevented
 - The cable glands shall not be used in Group I applications.
- ii. Armortex, E1EX-U, CXe and UNITEx type ranges of glands
 - The Armortex, E1EX-U, Cxe and UNITEx type glands have been tested for braided cable for group II and III only, when braided cable is fitted it shall only be used on fixed installations where the cable is clamped or stress applied to the cable in the gland is prevented.
- iii. Posi grip range of glands:
 - The gland shall only be installed / dismantled using the tool provided by CCG.

Certificate Annex

Certificate Number CML 16ATEX1001X

Equipment Cable Gland Series E1EX (VS)(QS)(VX), E1EX-U (VS)(QS)(VX), E1EX Lead Seal, D1EX (QS)(VX), CXe, CWe, EXCG (VS)(QS)(VX), VRTX SWA, FLP (QS)(VX), ARMORTEX (QS)(VX), EXCG-Lead Seal, FLP-TR (QS)(VX), FLPHOSE (QS)(VX), POSI GRIP (QS)(VX), A2EX (VS)(QS)(VX), A2EX-FHC (VS)(QS)(VX), VRTX, UNITEEx-D (VS), UNITEEx-E, UNITEEx~(QS)(VX), UNITEEx-F, UNITEEx-F~(QS)(VX), A2F-FHC (QS)(VX), TMC, TMCX
