

3-WAY BOTTOM ENTRY™

JUNCTION BOX - Ex eb I, Ex eb IIC, Ex ec IIC, Ex tc IIC

for Hazardous Area Installations

Features and Benefits

- 3-Way Bottom Entry™ Box for hazardous area lighting installations.
- For use in Group I mining (low impact areas), Group II and Group III applications.
- Screw-on lid provides ease of installation. Lid locking with a special key prevents unauthorized tampering.
- Supplied complete with safety securing lid lanyard.
- Only approved CCG cable glands and terminals must be used. No exposed metal parts.
- Dust and waterproof to IP66/68, when used with CCG sealed cable glands.
- No drilling or tapping of cable entries required.
- Mounting studs provided for DIN rail if using terminal blocks.
- Internal earthing to all entries and rail provided.

Technical Data

Type:	3-Way Bottom Entry™ Box
Box Material:	Impact corrosion and UV resistant glass reinforced polyester compound Polycarbonate (see-through adapt-a-lids) O ring seals: Silicone or Sarlink seals. Terminals: Wellamid or Wemidd
Inserts:	Brass internal earthing and rail mountings
Optional Accessories:	Certified Terminals, 3-Blanking Plugs and Box Spanner (Lid Locking Key)
Note:	The installer should check that the materials are suitable for the installation environment.

Conditions for Safe Use - X

- In Group I applications, the junction box must only be used in low impact areas and where it is not exposed to oils or greases.
- Only the CCG tool supplied shall be used for opening / closing the enclosure.
- Suitably certified cable glands and/or plugs shall be used in the enclosure threaded entries
- Terminal blocks shall only be used on the applicable rail and shall allow sufficient space to make connections and to close the cover / lid.
- Only the Weidmuller terminals shown in Table 2 may be used.
- The creepage and clearance between terminal blocks and from the terminal block to any earthed / bonded metallic part shall comply with the EN60079-7 requirements for the acceptable voltage of the terminal blocks.
- The current in the junction box is limited by the size of the conductor and shall not exceed the following:

Product Code	Box Size Reference	Entry Thread 'A'	Inside Dimension 'B'	Internal Diameter 'C'	Mounting Centres 'D'	Max. Current		Conductor / Terminal Block Size
						≤ 55°C Ambient	≤ 40°C Ambient	
100201-B	1	M20 x 1.5	68.0	101.0	132.0	8,34 A	11,90 A	2,5 mm²
100202-B	2	M25 x 1.5	100.0	123.0	162.0	11,12 A	15,86 A	4 mm²
						14,25 A	20,33 A	6 mm²
						19,81 A	28,26 A	10 mm²
						26,42 A	37,68 A	16 mm²
						43,46 A	61,98 A	35 mm²
						52,50 A	74,88 A	50 mm²
						66,75 A	95,21 A	75 mm²

All dimensions are in mm.

3-WAY BOTTOM ENTRY™ JUNCTION BOX

Wiring and Installation instructions for 3-Way Bottom Entry™ Box without components

- Installation must be carried out by a competent person.
- The box must not be modified in any way, as this will invalidate the certification.
- Where cables enter the box they must be secured by CCG Cable Glands appropriate to the make up of the cable.
- Unused entry apertures must be blanked with certified CCG Blanking Plugs.
- To maintain IP 66/68 a thread seal gasket between the box and cable gland must be installed.
- Before replacing the lid, ensure the lid gasket is in place.
- The use of a CCG Box Spanner (Lid Locking Key) is required to maintain the tamper proof integrity of the box, refer Figure 1.

Wiring and Installation instructions for 3-Way Bottom Entry™ Box with components

- Installation must be carried out by a competent person.
- Do not install under live current conditions.
- The box must not be modified in any way, as this will invalidate the certification.
- All wiring must be carried out in accordance with the relevant Codes of Practice.
- The wiring insulation must not extend by more than 1.0mm from the metal face of the terminal as shown in Figure 2.
- The voltage and current value of the box must not be exceeded.
See relevant certificate for current limitations for conditions of use / schedule of limitations.
- Only those terminals shown in the terminal schedule may be incorporated in the box, refer Table 1.
- Inner cable bedding must protrude into the box by a minimum of 20mm past the cable entry point.
- Not more than one single or multiple strand lead shall be connected into either side of the terminals.
- Only earth conductors of equal size shall be connected with rail mounted terminals.
- All terminal screws used and unused shall be tightened.
- A parallel shaft screw driver of the correct size should be used for rail mounted terminals screws.
- Where cables enter the box they must be secured by CCG Cable Glands appropriate to the make up of the cable.
- Unused entry apertures must be blanked with certified CCG Blanking Plugs.
- To maintain IP66/68 a thread seal gasket between the box and cable gland must be installed.
- Before replacing the lid, ensure the lid gasket is in place.
- The use of a CCG Box Spanner (Lid Locking Key) is required to maintain the tamper proof integrity of the box, refer Figure 1.

TABLE 1

Box Type	Box Size	Terminal Type and Size	Max Quantity	Rail Size
3-Way BE Box	1	4mm ² mini terminal	8	15
3-Way BE Box	2	2.5mm ²	12	35
3-Way BE Box	2	4mm ²	10	35
3-Way BE Box	2	4mm ² mini terminal	12	15
3-Way BE Box	2	6mm ²	8	35
3-Way BE Box	2	10mm ²	7	35
3-Way BE Box	2	16 mm ²	6	35
3-Way BE Box	2	35mm ²	3	35

FIGURE 1

To ensure the box apparatus is tamper proof: Screw on, tighten and lock lid in place by means of a CCG Box Spanner (Lid Locking Key).

CCG Box Spanner
